Customer Reviews Most helpful customer reviews 7 of 7 people found the following review helpful. which I really like as the book will lie flat and the pages ... By S. Warner I bought this Trail Guide workbook to go along with the text book. So far, I am loving both! The workbook (as is the textbook) is in spiral format, which I really like as the book will lie flat and the pages stay where they are placed. It follows along with the text as far as the contents go. There are lots of illustrations, fill in the blank, label the parts, and 'describe the action' type activities. The answers are provided in the back of the book. My plan is to really learn the material though, so I won't look at the answers until the exercise is complete! The price tag of \$24.95 seems at first glance, a little steep for a workbook, but it really isn't. There is a ton of helpful information that coordinates with the text, in this workbook. I highly recommend both books. 5 of 5 people found the following review helpful. Great tool for studying!!
