About the Author Karen Timberlake is Professor Emerita of chemistry at Los Angeles Valley College,

where she taught chemistry for allied health and preparatory chemistry for 36 years. She received her bachelor's degree in chemistry from the University of Washington and her master's degree in biochemistry from the University of California at Los Angeles. Professor Timberlake has been writing chemistry textbooks for 35 years. During that time, her name has become associated with the strategic use of pedagogical tools that promote student success in chemistry and the application of chemistry to real-life situations. More than one million students have learned chemistry using texts, laboratory manuals, and study guides written by Karen Timberlake. In addition to Basic Chemistry, Fourth Edition, she is also the author of General, Organic, and Biological Chemistry: Structures of Life, Fourth Edition, and Chemistry: An Introduction to General, Organic, and Biological Chemistry, Eleventh Edition with the accompanying Study Guide, Selected Solutions Manual, Laboratory Manual, and Essential Laboratory Manual. Professor Timberlake belongs to numerous science and educational organizations including the American Chemical Society (ACS) and the National Science Teachers Association (NSTA). She was the Western Regional Winner of Excellence in College Chemistry Teaching Award given by the Chemical Manufacturers Association. In 2004, she received the McGuffey Award in Physical Sciences from the Text and Academic Authors Association for her textbook Chemistry: An Introduction to General, Organic, and Biological Chemistry, eighth edition, which has demonstrated excellence over time. In 2006, she received the Textbook excellence award for the first edition of Basic Chemistry. She has participated in education grants for science teaching including the Los Angeles Collaborative for Teaching Excellence (LACTE) and a Title III grant at her college. She speaks at conferences and educational meetings on the use of student-centered teaching methods in chemistry to promote learning success of students.

Customer Reviews Most helpful customer reviews 1 of 1 people found the following review helpful. great deal! I read By Amazon Customer great deal! I read, highlighted, and wrote on this book more than on any other textbook I ever had. It was in great conditions when I got it (now it looks like a kindergarten book) and I would only recommend you to buy it if your professor is using the same version or the next one because it is the same thing except for the cover and pages numbers. 0 of 0 people found the following review helpful. This was rented for our daughter for her summer class ... By Roxanne Showers This was rented for our daughter for her summer class for college and it was a life saver because I will not buy anymore college books unless I have too because they don't get their money out of them when they are done and the are way over priced at the bookstore in school. 0 of 0 people found the following review helpful. Not enough time By KMM Time of rental is too short, I guess that's a way to get more money from students. Rental time should match school semester. As it is, you have to pay \$9.00+ for an extra week. See all 387 customer reviews...
