Years ago, the skies ripped open and the world was destroyed in fire and ash. Dragons - once creatures of legend - are the enemy. Vicious and unpredictable, they rule the skies of the ruined cities, forcing humanity to huddle behind barricades for safety. Claudia's a survivor. She scrapes by as best as she can in a hard, dangerous world. When she runs afoul of the law, she's left as bait in dragon territory. She only has one chance to survive - to somehow 'tame' a dragon and get it to obey her. Except the dragon that finds her is as wild and brutal as any other...and he's not interested in obeying. What he is interested in is a mate.

She spins a great yarn: -) By Book Obsession 07 I will start this by saying that a lot of post-apocalyptic or sci-fi books are not my thing. However, Ruby Dixon is one of about 2 Or 3 authors that I will buy these from. She spins a great yarn :-). So when I saw this one come up I immediately one-clicked and started reading the next day. Really enjoyed this book! Interesting characters and character development. This lady has a great imagination to come up with all the details and ideas in this book. I can totally imagine 'Fort Dallas' and the devastation that is described in the book. As

always, the romance was good and the sex was hot! The heroine, Claudia, was a bit wishy-washy at times but I understood a bit of her inner conflict so I was okay with it in the end. Overall, I was totally taken with the story and cannot wait to read more in the series! Safe read - some possible triggers with other characters. No cheating, no OW/OM drama. Also condom free if that's your thing! 0 of 0 people found the following review helpful. A new dark world and a concise story without the depression By Caressa I have been reading Ruby's Blue Barbarians series since the beginning and just love it. So when this new series came out I was excited to see what new world she came up with. This new world is a bit urban/dystopian fantasy in the vein of The Kate Daniels series by Ilona Andrews. This Earth is changed due to an event that we have yet to get the full explanation of. There have been hints and of course there are the dragons. They have also been affected by this event. With the world in ruin, people huddling together to survive, wild lands, highwaymen, and crazed dragons, it seems people are only living to survive. Dragons are seen as mindless killers that have come and ruined the world. It turns out that isn't quite what is happening. As the story unfolds we learn a lot about what it going on with the dragons. I fell in love with this series because it has always been a subject that interests me, but most authors tend to go too dark with it. Ruby has done a really good job of building this world and creating these characters without making it bleak and depressing or too intense. The world building is just enough to give us a view on this destroyed world without weighing the reader down. The characters are fleshed out enough to see their past and their plight. We move with them in this new world and like them we don't have any answers. We know the dragons are there and that they destroyed everything, but not why. So far there have been a couple of books and the story is really opening up into a much bigger story than I anticipated. I look forward to seeing how things progress and what is revealed. In short the series has some nice characters that don't have their spirits broken by this awful world they find themselves in. There is still humor and internal dialogue. There's bravery and courage. It is just nice to see a end of the world story without all the depressing bleakness and pain. You know it is there, but it isn't dwelled upon. The story focuses on our characters and follows them as they try to survive and adapt. 2 of 2 people found the following review helpful. Smokin!!!! By Black Feather Blogger Ruby, your killing me. Now instead of an IPB addiction that requires regular fixes, I now require Dragon fixes as well. You have an inmate talent for giving the reader a great read that is very unique. Your world building and character development is top class and in this new series your off to a great start. I'm really looking forward to reading the next in the series and suspect that there might be many more to come. No doubt about it you've got a winner on your hands. See all 546 customer reviews...
