Customer Reviews Most helpful customer reviews 172 of 173 people found the following review

helpful. .30 cents per sticky flag? Really By P. Kay .30 cents per sticky flag? Really? I was expecting something more than cheap 'post note flags' I was expecting something more than 36 cheap flags for \$11 dollars. The picture makes each of the tabs appear like those semi-hard taps we all have seen in professional binders. Not these. These are lightly sticky, and bendable/crease-able. Way too much money for what these are. Even \$5 dollars would be pushing it. Update: 08/08/2014 I found the tabs that I was expecting these to be for around \$15+ shipping. <http://diagnostictabs.com/> If you compare the two you will understand what you are really buying with product. 151 of 152 people found the following review helpful. Clean and Simple By PicOlio I love the transparency of these... sure any tabs will work but the convenience of having these already typed up in an easy to read font is rather nice. I think the price is a bit high, but the usefulness makes splurging worth it... I added some pics of them installed so you can better see the transparency of them... hope it helps with your purchase decision.. 35 of 35 people found the following review helpful. CHEAP. Might as well use scotch tape. By Ryno These are terrible. Not worth \$1 let alone \$10+.... I expected something better than this. When the DSM-5 came out, I 'tabbed' one for one of my professors (I am the GA at our masters program) and they were well made, sturdy tabs. These tabs? Like scotch tape, with less 'stick'. Go somewhere else... this was not worth it. See all 302 customer reviews...
