Review The book is presented in a very logical manner, starting with the wish-list (read 'impossible expectations') of parents and students, which inspired this book. Then come the real reasons why most students find classes boring, and how classes can become more interesting. The narration is clear, concise and does not obfuscate. Like his lectures, the narration is split into clear segments and bullet points, which are easy to understand and digest. The instructions are well supported by apt and interesting examples, results of actual international studies, and some quotes. The language is clear, with the clarity of Ashwin Sanghi's earlier '13 Steps...' books. This book also discusses how to score marks by being methodical, neat, apt and thorough (in addition to knowing the answers to the questions). Overall, a book to read and reread. --By sheba on 24 July 2017 This is the third book in 13 Steps Series - the other two being 13 Steps to Bloody Good Luck and 13 Steps to Bloody Good Wealth(both have been reviewed by me). This book is yet again an exceptional outlay pertaining to the subject which was kept as the title. We never had understood the smaller things what we did as

a kid has in fact helped us greatly. This includes reading in a sitting posture or walking while reading. We have also avoided television (most of the times) and there are so many which we did but had eventually forgotten and when it comes to our own kids, we tend to adopt an approach which is been followed presently which is incorrect. What has worked for you can be tried and replicated with your kid as well. --By sarath on 10 August 2017 About the Author Ashwin Sanghi ranks among India's highest-selling authors of English fiction.
